Meeting Minutes
August 17, 2023
via Zoom

Commissioners present – Mary Dudek, Melinda McCall, Joe Rogers

Members of the public present – Kevin Chrobak, Rob Todisco, Jeff Squire

Meeting was called to order at 7:00 pm.

Consideration of change to NOI, Public Safety Complex:

- Allowance of a plan change was requested by the architect and project manager for the Public safety complex. The addition of propane heated radiant flooring in the equipment bays and a propane generator requires larger, 200 gallon propane tanks. The original tanks were going to be buried, but these larger tanks would be close to the water table and susceptible to rust. Therefore, concrete pads are required as bases for the tanks. The location for these tanks is in the riverfront area and will be a small increase over the permitted impervious area. The concrete should be able to be poured via a pump truck so that no large equipment is in that riverfront area.

A motion was made and approved unanimously to allow the additional concrete pads, with the condition that eight additional native shrubs are planted in the area between the pads and the river to increase absorption of runoff.

Next Meeting: August 31.

Meeting was adjourned at 7:20

Respectfully submitted,
Melinda McCall
Secretary - Williamsburg Conservation Commission
